

A decorative graphic on the left side of the slide consists of two overlapping parallelograms. The front one is blue and the back one is a light green. They are positioned diagonally, with the blue one partially covering the green one.

Hexadecimal numbers

by Adham Hany

What is Hexadecimal ?

Hexadecimal numbers are a base-16 number system, which means they use 16 unique symbols to represent values. These symbols are the digits 0-9 and the letters A-F, where A represents 10, B represents 11, and so on, up to F which represents 15.

Number	0	1	2	3	4	5	6	7
Binary	0000	0001	0010	0011	0100	0101	0110	0111
Hexadecimal	0	1	2	3	4	5	6	7

Number	8	9	10	11	12	13	14	15
Binary	1000	1001	1010	1011	1100	1101	1110	1111
Hexadecimal	8	9	A	B	C	D	E	F

What is the use of Hexadecimal?

Shorthand for Binary

Memory Addressing

All because it is
more optimized
way to represent
Data

Color Codes

MAC Addresses

Can we use Hexadecimals in our daily life?

Yes we can, you can encrypt with it your secrets , or make it as your password with a hidden message, all of this comes to your imagination.
